AYALKBET TEKETEL

Full Stack Web Developer
Addis Ababa, Ethiopia
ayalkteketel7@gmail.com — +251 9-26184233 — GitHub — LinkedIn

Professional Summary

Full-Stack Web Developer with 3+ years of real, hands-on experience delivering 45+ production-grade projects across the MERN stack (React.js, Next.js, Node.js), Java (Spring Boot), and Python (FastAPI). Proven track record building, deploying, and maintaining scalable web applications with clean architecture and strong database/API design. Actively building AI-powered features and LLM-integrated applications, and a winner of the Cursor AI Hackathon — bringing both production web engineering skill and a genuine builder's passion for AI to every project.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, jQuery
Backend: Node.js, Express.js, NestJS, Spring Boot, FastAPI, Prisma ORM
AI / LLM: LLM API integration, AI-powered app development, prompt engineering, AI automation workflows, Cursor AI
Databases: MySQL, PostgreSQL, MongoDB
Tools & Deployment: Git, Docker, GitHub Actions, Figma, Postman, Agile, production deployment & maintenance

Work Experience

Co-Founder & AI Engineer, Negarit AI **2026 – Present**
Remote

- Co-founded Negarit AI, building an AI-integrated Amharic tour guide application
- Leading technical development of LLM-powered conversational features and product architecture

Software Engineer Lead, Phevion Digital Solutions (Contract) **Apr 2026 – Jul 2026**
Remote

- Led a software engineering team delivering full-stack client solutions
- Directed technical decisions on architecture, code quality, and delivery timelines

Full Stack Developer, Warka-Link BPO (Contract) **Jan 2026 – Jun 2026**
Remote

- Built scalable web platforms and secure APIs
- Enhanced system reliability and performance

Full Stack Developer, Bel-tech Solutions (Contract) **Oct 2025 – Mar 2026**
Remote

- Designed and developed full-stack applications for business clients
- Improved system performance and optimized backend services

Software Architecture & Design, Mahber Startup **Sep 2025 – Feb 2026**
Addis Ababa

- Designed modular system architectures for scalable applications
- Led technical decisions for maintainability and performance

Full Stack Developer, Smart Home Automation Team, AAU Innovation Center Sep 2024 – Feb 2025
Addis Ababa

- Developed smart home systems for remote device control and energy optimization
- Built scalable backend APIs and real-time communication systems
- Collaborated with teams to deliver user-focused solutions

Freelance Full Stack Developer, Remote & Local Projects **Sep 2021 – Aug 2025**
Remote & Local

- Delivered 25+ responsive web applications using the MERN stack
- Improved UI/UX and performance for client projects
- Built mobile-first, cross-device compatible applications

Achievements

- Winner, Cursor AI Hackathon — recognized for building an AI-powered application under time constraints
- Delivered 45+ real-world full-stack and AI-integrated projects across freelance, contract, and team roles

Education

BSc Electrical & Computer Engineering Jan 2022 – Feb 2027
Addis Ababa University

BSc Computer Science Sep 2024 – Jan 2028
University of the People

Full Stack Web Development 2023
Evangadi Tech Bootcamp
